*** WLTP test cycle.

PLUG-IN HYBRID POWERTRAIN

ELECTRIC MODE

*The vehicle can be driven in 100% electric mode up to 136km/h (where legally permitted), so you can enjoy an exceptionally smooth and quiet driving experience. It offers a range of up to 55*km, suitable for most daily journeys.*

HYBRID MODE

The car automatically chooses the best balance between the electric motor and PureTech petrol engine for optimal efficiency.

New Citroën optimum which combines 360 Nm

** Range in Electric mode of between 54 and 55 km, depending on the vehicle's equipment. The range may vary depending on the actual conditions of use.*

SPORT MODE

Volvo C5 Aircross Plug-In Hybrid offers performance thanks to the electric motor. It also uses the PureTech petrol engine to provide a total power of 225 hp and combined torque of 309 Nm.

New C5 Aircross Plug-In Hybrid combines all the advantages of 100% electric driving for everyday trips with the range offered by its PureTech petrol engine for longer journeys. The e-EAT8 8-speed electrified automatic gearbox optimises gear changes, enhancing the smoothness and driving pleasure for the driver and passengers. This gearbox includes two regenerative braking modes: a conventional mode in position D (Drive), and a second, more dynamic mode referred to as mode B (Brake), which permits amplified recovery of the power available during braking and deceleration. In addition, the selector, ideally positioned on the centre console, allows the driver to choose the driving mode: Electric, Hybrid or Sport.

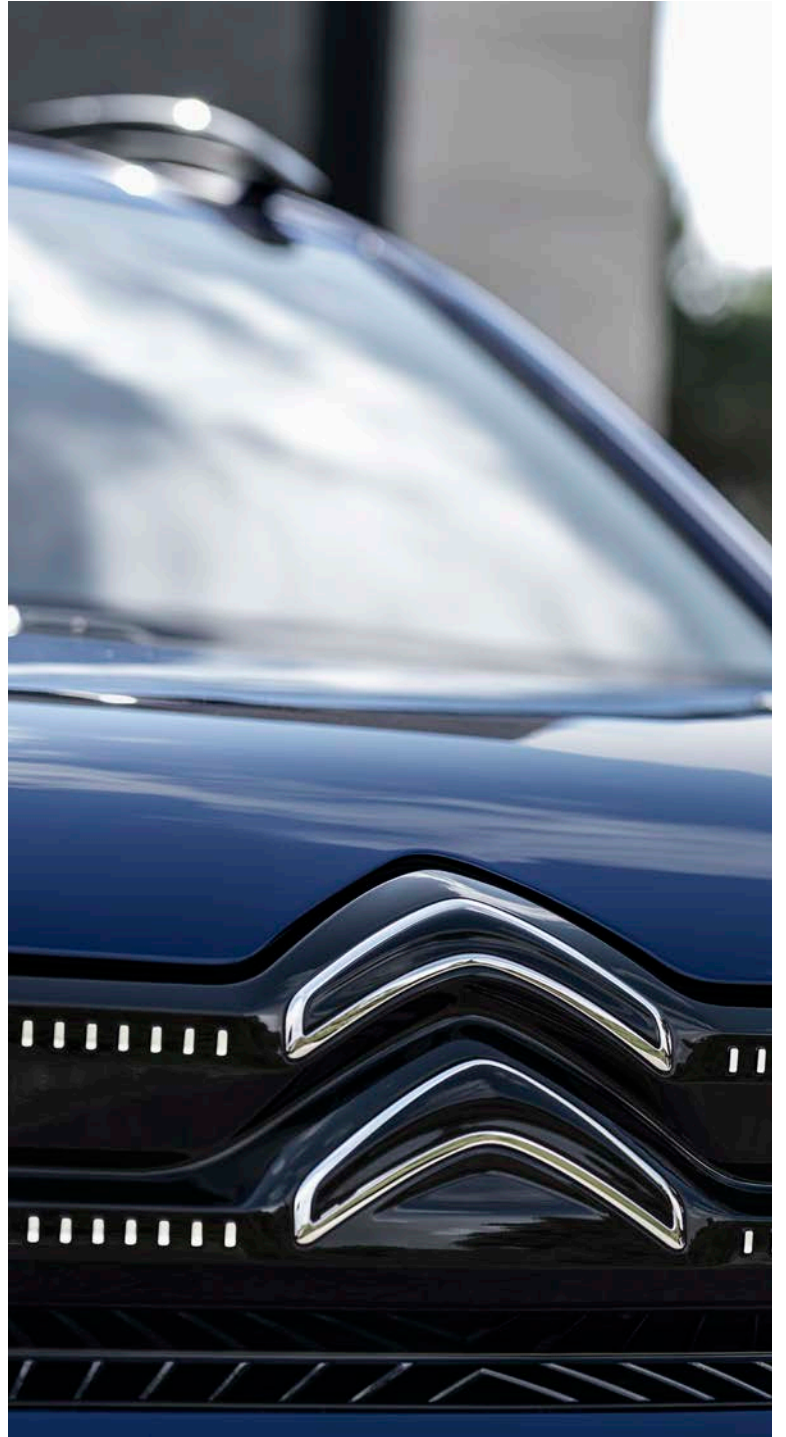

When the vehicle is being driven in Electric mode, an aqua blue light illuminates at the base of the electrochromatic interior mirror, clearly visible from the outside, to indicate this.

PETROL AND DIESEL ENGINES

New Citroën C5 Aircross has a range of the latest generation efficient and responsive Euro 6 engines, for increased driving pleasure. It can be equipped with either the PureTech 130 S&S petrol engine or the BlueHDi 130 S&S diesel engine, each available as a 6-speed manual or with EAT8 8-speed automatic transmission.

STYLE

A NEW DYNAMIC FRONT FACE

New Citroën C5 Aircross has a new front end which accentuates its robust character. Typically Citroën, the "V" LED light signature, both fine and sculpted, creates a 3D effect by means of a "piano key" detail. The discreet LED Vision headlights visually extend the gloss black grille. All sculpted lines, it sets itself apart through chrome highlights and gloss black chevrons, with a chrome surround in the central section. The main air intakes have sharper lines which sculpt the lower front panel. The side scoops increase the aerodynamic properties and visually widen the vehicle.

Finally, a polished aluminium fairing reinforces the SUV character and emphasises the upmarket, dynamic, and robust front end.

In perfect coherence with this new design, New Citroën C5 Aircross is fitted with new 3D-effect LED rear lights.

ROBUST AND ELEGANT

A CHARACTER THAT REFLECTS YOUR PERSONALITY

New Citroën C5 Aircross asserts its presence thanks to its high and horizontal bonnet, its large 720 mm diameter wheels, its raised ground clearance, its Airbumps® and its roof rails. An elegant chromed "C" signature surrounds the wide side windows and accentuates the floating appearance of the roof. To personalise your New Citroën C5 Aircross, you can choose from 6 body colours, including the new Eclipse Blue metallic paint. The choice of a black two-tone roof and 3 Colour Packs, Glossy Black, Dark Chrome or Energic Blue, are also available.

REFINED INTERIOR

SPACIOUS AND WELCOMING PASSENGER COMPARTMENT

As soon as you open the doors, the interior of New Citroën C5 Aircross gives an impression of comfort, peace of mind and space. Simply take your seat, and you'll immediately feel valued and protected, thanks to the high driving position and the spacious and upmarket cabin.

The completely horizontal dashboard incorporates a new 10" HD capacitive touch screen.

The materials, inspired by the world of travel and luggage, are a pleasure to both see and touch. The combination of gloss black details and chrome inserts, as well as finishing touches like the elegantly designed overstitching, show the care taken over the details.

Like the exterior, the interior adapts to your tastes thanks to a wide choice of quality textures, from subtly textured cloth, to Alcantara®, to Paloma perforated leather.

A photograph of the interior of a Citroën C5 Aircross. A man with dark hair and a beard, wearing a dark blue jacket, is sitting in the driver's seat, looking out the window. The car's interior features dark leather seats with blue stitching and a sunroof. The background shows a city skyline at dusk or dawn.

3 INTERIOR AMBIENCES

New Citroën C5 Aircross has 3 new ambiances which create an elegant and dynamic atmosphere on board. All feature new blue overstitching on the seats, the dashboard and the door trim pads. Each is fitted with Advanced Comfort seats for optimum seat and driving comfort.

Wild Black ambience

This harmoniously combines the new, very modern, textured Flamine Black cloth with a grey leather-effect fabric on the upper part of the seats, which amplifies the feeling of interior space.

Urban Black ambience

This expresses true dynamism thanks to the combination of black Alcantara® and a black leather-effect fabric.

Metropolitan Black ambience

This opts for elegance and refinement, featuring seats trimmed in a new grained black leather combined with a grey leather-effect fabric at the top of the seat backs.

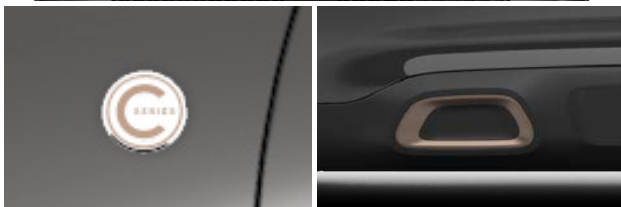

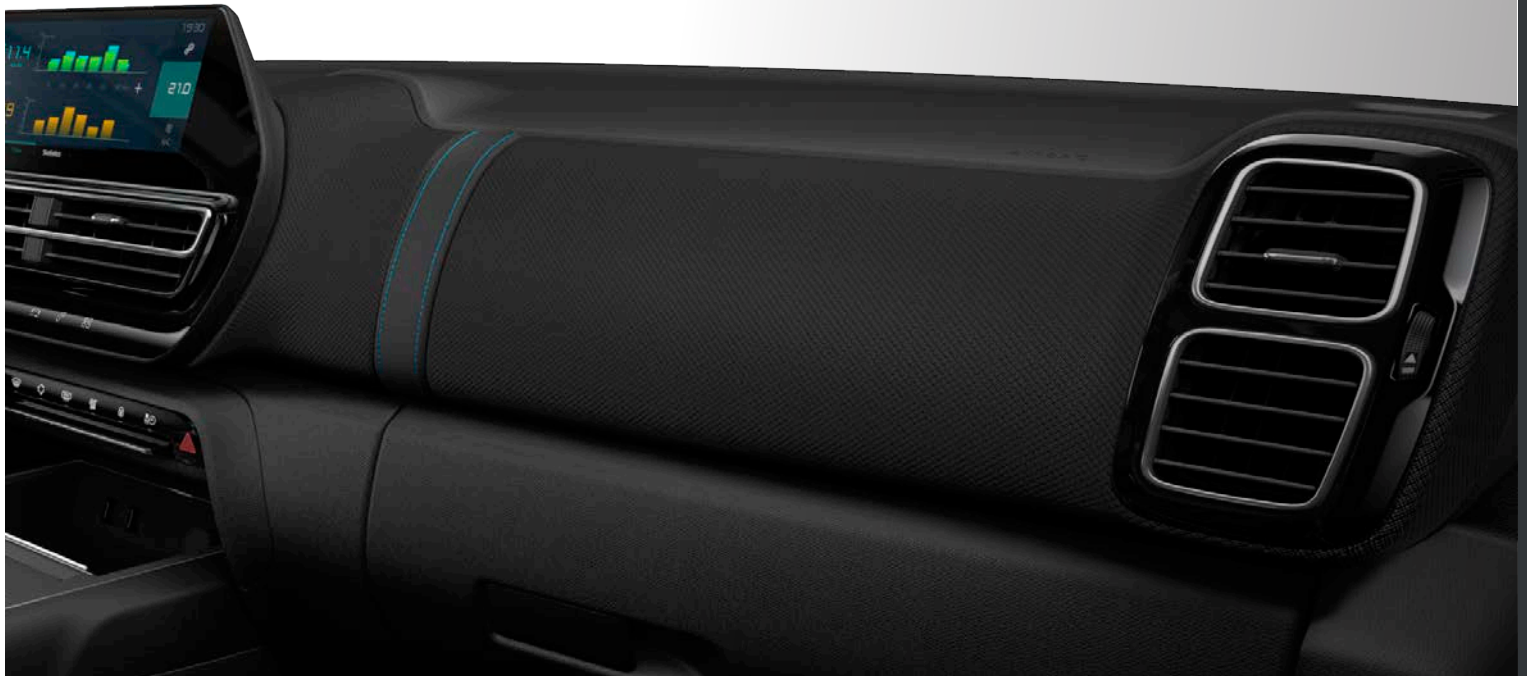

NEW CITROËN C5 AIRCROSS

C-SERIES EDITION

Designed with iconic colours, special materials and high-tech equipment offering unique style and comfort, the Citroën C-Series Edition combines all of the elements of the Citroën spirit. The 'C-Series Edition' name pays homage to the 'C' of the Citroën brand, the exceptional comfort that has distinguished it for more than 100 years, and has the undeniable character of all of its models.

The dynamic character of New Citroën C5 Aircross and its range of subtle style touches are enhanced by the visual features of C-Series Edition. It introduces a new Anodised Bronze Colour Pack. This coloured insert can be found on the Airbumps® and the lower front panel scoops. On the front wings, a "C-Series" badge emphasises the distinctive design of this trim. A bi-tone roof complements the range of exterior colours, combining a Perla Nera Black roof with multiple body colours. Inside, New Citroën C5 Aircross C-Series Edition offers the Metropolitan Black Ambience which incorporates Advanced Comfort seats for the comfort of everyone on board. New Citroën C5 Aircross C-Series Edition is also available in plug-in hybrid.

WELL-BEING

FOR UNRIVALLED ULTIMATE COMFORT

Contemporary and welcoming, the interior of New Citroën C5 Aircross has been designed to ensure serenity reigns supreme. The CITROËN ADVANCED COMFORT® programme delivers innovative, technological and intelligent solutions to create well-being for drivers and passengers alike, and confirms Citroën's driving-comfort credentials. Four main themes are at the heart of this comfort engineering: the cocoon effect, practicality, fluidity and peace of mind.

THE COCOON EFFECT

BRIGHTNESS AND SOFTNESS FOR EVERYONE
New Citroën C5 Aircross innovates with its overall comfort, as you'd expect from Citroën. The large panoramic sunroof* provides exceptional brightness and a feeling of well-being for the driver and all passengers, making every journey a special experience.

On board, everyone benefits from exceptional insulation from the outside world: road noise and wind noise have been reduced by means of acoustic laminated front windows*, with increased thickness and an insulating layer.

For optimum comfort, New Citroën C5 Aircross is also fitted with a system for purifying the air in the passenger compartment, AQS* or "Air Quality System", which detects pollution of the exterior air and filters it by automatically adjusting the circulation mode in the passenger compartment.

** Dependent on version.*

CITROËN ADVANCED COMFORT® SUSPENSION

"FLYING CARPET" EFFECT

Developed as a world exclusive by Citroën, the suspension featured on New Citroën C5 Aircross offers unprecedented driving comfort. This innovation filters out and absorbs both major imperfections and small irregularities in the road surface to give the impression that you are flying over the road, while guaranteeing exceptional body stability and dynamism.

New Citroën C5 Aircross Plug-In Hybrid benefits from multi-arm rear suspension, which guarantees perfect balance, whatever the driving conditions.

EXCEPTIONAL RIDE QUALITY

Whereas conventional suspension has a shock absorber, a spring and a mechanical stop, Citroën Advanced Comfort® suspension adds 2 hydraulic cushions on either side, one for rebound and one for compression.

ADVANCED COMFORT SEATS

YOUR LOUNGE ON THE MOVE

At the cutting edge in terms of comfort, New Citroën C5 Aircross is fitted with seats with wide cushions and seat backs, in a new design inspired by the most comfortable furniture.

Their innovative composition, combining high density foam at the core of the seat and a 15 mm thick textured foam on the surface, guarantees permanent support and softness of the cushion without any sagging over time. The whole structure offers a level of driving comfort which has never been felt before in a car and transforms both short and long journeys.

IN-VEHICLE WELL-BEING

CLEVER STORAGE COMPARTMENTS

On-board comfort also means having somewhere to put everything you need, which is why New Citroën C5 Aircross has numerous practical and functional storage compartments. Between the large space under the central armrest, its glove box and its wide storage compartments in the doors, there's room for everything.

At the front of the centre console, there is a large storage area alongside a space dedicated to connectivity, including two USB ports*.

**Dependent on version.*

The image shows the rear passenger area of a Citroën C5 Aircross. It features three individual seats with a dark grey or black leather-like finish and blue accents on the headrests and seat stitching. The seats are positioned in a way that shows their reclining capability. The interior door panels and center console are also visible, showing a modern and functional design.

3 FULL-SIZE REAR SEATS

COMFORT FOR EVERYONE

With its 3 individual seats in the rear, New Citroën C5 Aircross sets itself apart in its segment. As they are of identical width, they provide the same comfort for the middle passenger as for the other occupants.

They recline, offering 5 different positions, for optimum comfort. They can also slide forward by up to 150 mm, optimising the interior space or the boot volume according to your requirements. They can also be folded flat to form a truly flat load space.

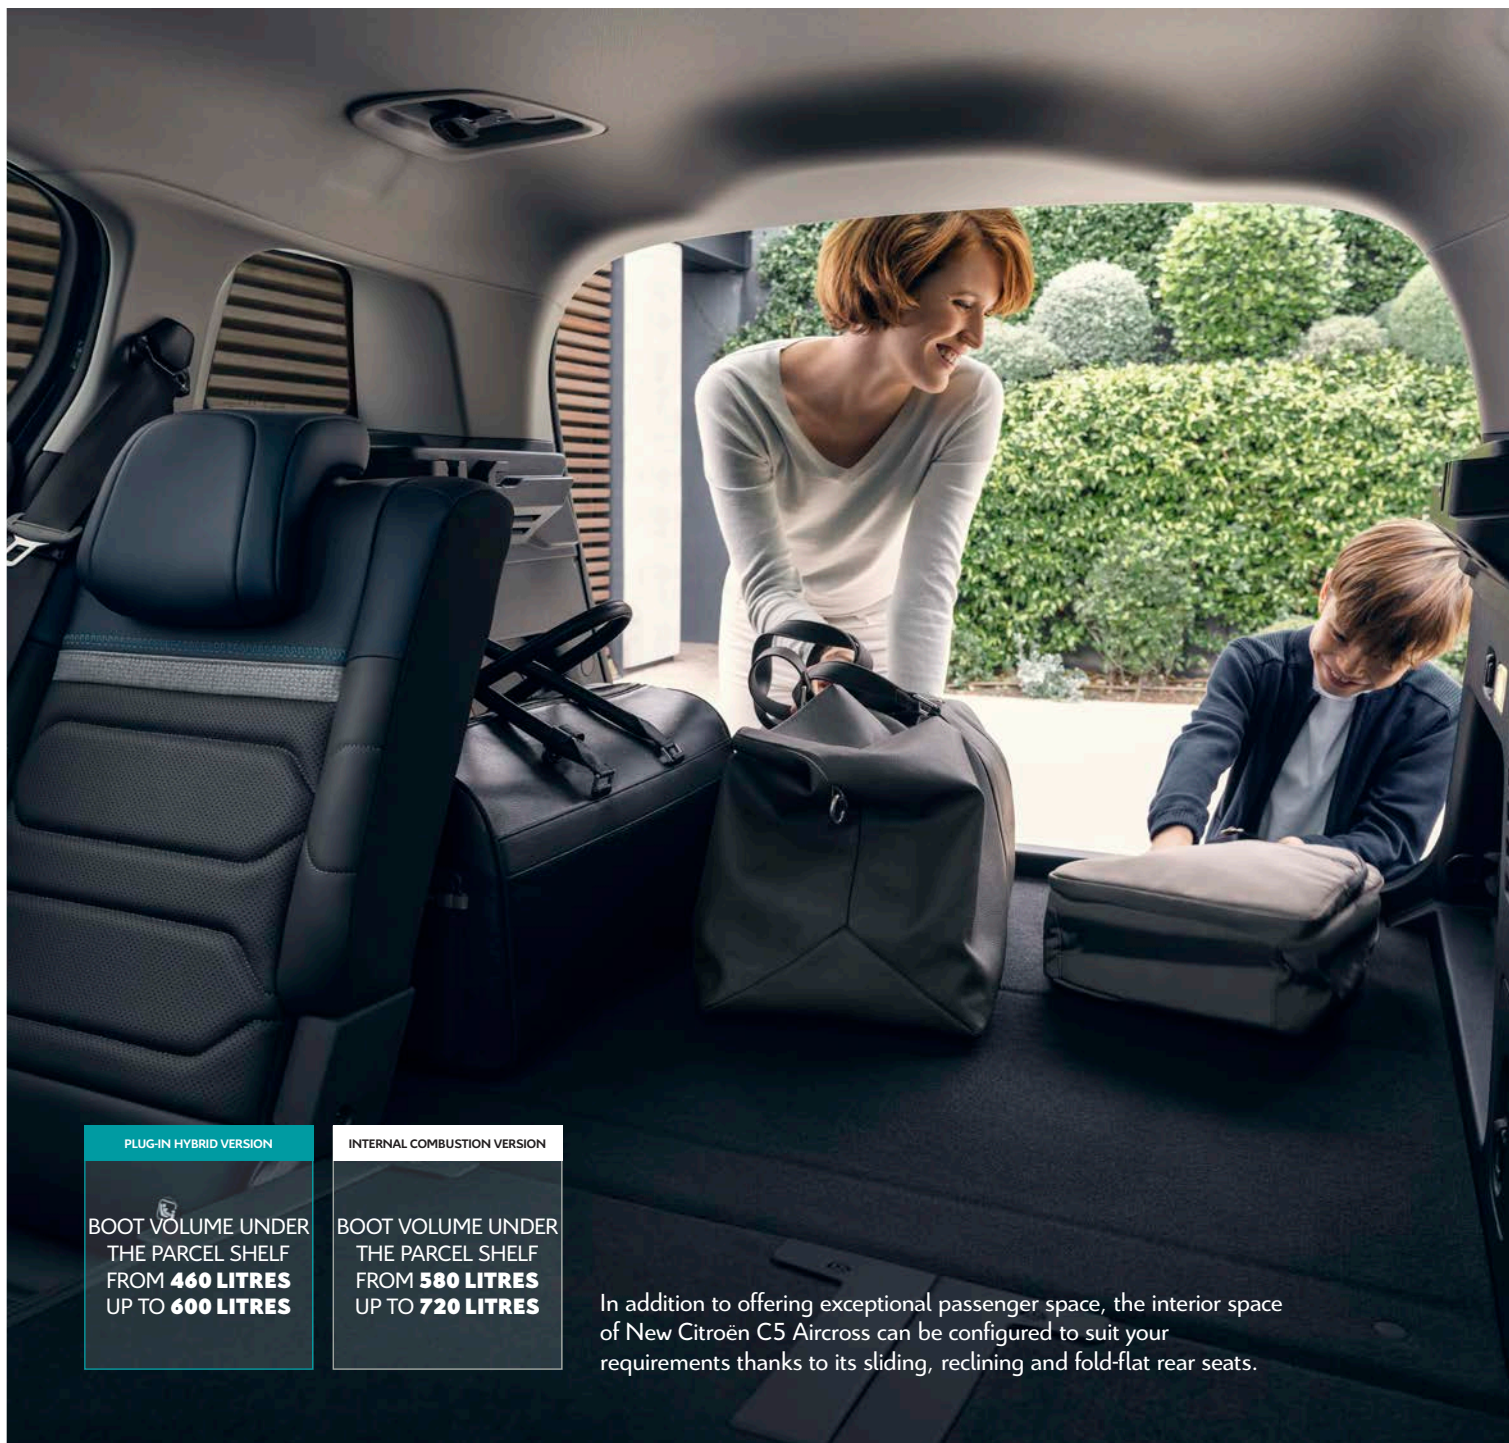

HANDS-FREE OPENING

The boot volume of New Citroën C5 Aircross is 580 litres, which can be extended up to 720 litres with the rear seats moved as far forward as possible, making the boot the most generous in its category. It reaches 1,630 litres with the rear seats folded flat. The clever boot floor configuration gives you the choice of maximum space or a truly flat floor thanks to its adjustable floor with two positions.

In the plug-in hybrid version, the boot volume remains the largest in the segment, from 460 litres to 600 litres. It also offers a clever storage compartment dedicated to the charging cable under the floor, which is hinged for easy access.

The vehicle has a convenient hands-free tailgate*, which you can open with a simple movement of your foot under the rear bumper.

** Dependent on version.*

PLUG-IN HYBRID VERSION

In addition to offering exceptional passenger space, the interior space of New Citroën C5 Aircross can be configured to suit your requirements thanks to its sliding, reclining and fold-flat rear seats.

PEACE OF MIND

FOR YOUR COMFORT AND SAFETY

For peace of mind on all your journeys, New Citroën C5 Aircross ensures perfect continuity between your digital world and your vehicle, using advanced connectivity technology. To these intuitive systems are added numerous truly useful driving assistance systems, which enhance safety and make everyday driving easier.

A close-up photograph of the driver's side of a Citroën C5 Aircross. The steering wheel is black with the Citroën logo in the center and has several control buttons. A person's hand, wearing a light blue sleeve and a silver bracelet, is visible near the steering wheel. The background shows the side mirror and the interior door panel.

CONNECTED NAVIGATION IN IN REAL TIME

A MORE ERGONOMIC TOUCHSCREEN

The new 10" high-definition gloss black capacitive touchscreen fitted in New Citroën C5 Aircross is responsive and intuitive to use. Perfectly positioned on the dashboard, the touchscreen makes it easy to access the My Citroën Drive navigation system. Combined with TomTom connected services, this 3D navigation system provides real time traffic information, the location of car parks and service stations, the price of fuel and the indication of danger zones. You can even find out local points of interest or the weather at your destination. You'll be pleased to find that the air conditioning controls are accessible at all times on this new touchscreen. Everything you need to help you reach your destination with complete peace of mind is at your fingertips.

HIGH RESOLUTION TFT DRIVER'S DISPLAY

New Citroën C5 Aircross is also fitted with a customisable 12.3" TFT digital instrument panel. This presents exceptionally easy to read driving information which you can configure as you wish, choosing from 5 modes and 3 ambiances (Blue, Brown and Red).

SIMPLIFY YOUR JOURNEYS

MY CITROËN ASSIST

This geolocated emergency and assistance call service, offered free of charge, without subscription and available 24 hours a day, 7 days a week, sends the appropriate help either automatically or when you press the emergency or assistance button.

Specifically enhanced for electric vehicles, My Citroën Assist also displays local charging points and a representation of the area that can be covered in 100% electric mode with the remaining battery charge. Everything you need to help you reach your destination with complete peace of mind is at your fingertips.

MY CITROËN PLAY

Thanks to this function, compatible with Android Auto™ and Apple CarPlay®, the touch screen allows you to duplicate your smartphone's display to find routes, make calls, send messages and listen to music, all without taking your eyes off the road.

Depending on the device, some applications may be controlled by voice, so you can keep your eyes on the road at all times.

MY CITROËN APP

Thanks to the My Citroën smartphone app, you can access and control certain functions of your New Citroën C5 Aircross remotely, such as the Find My Car function, perfect when you've parked in an unfamiliar location.

In New C5 Aircross Plug-In Hybrid, you can also check the electric range, schedule charging and even activate temperature pre-conditioning, so you can set the passenger compartment to a comfortable 21°C before you set off.

HIGHWAY DRIVER ASSIST

A FIRST STEP TOWARDS SEMI-AUTONOMOUS DRIVING

Perfect for motorway driving, this system* actively manages lateral position and speed within a lane for a more relaxing driving experience. Simply select a speed setting from 30 km/h and the system will maintain the lateral position of New Citroën C5 Aircross in its traffic lane, by following the road markings. As it features Adaptive Cruise Control with Stop & Go, your vehicle can even bring itself to a complete stop and move off again according to the movements of the vehicle in front. Note that, for this system to stay active, the driver's hands must remain on the steering wheel and the driver must maintain control and vigilance at all times. The driver may take back full control at any time.

** Dependent on version.*

WELL-BEING AND PEACE OF MIND ON BOARD

ADAPTIVE CRUISE CONTROL WITH STOP & GO*

Using a camera and radar, the system detects the vehicle in front and automatically maintains the safe distance chosen by the driver by acting on the brake and the accelerator, if necessary until the vehicle is stationary. The vehicle can also move off again without any action by the driver. Available on all versions equipped with the EAT8 8-speed automatic gearbox.

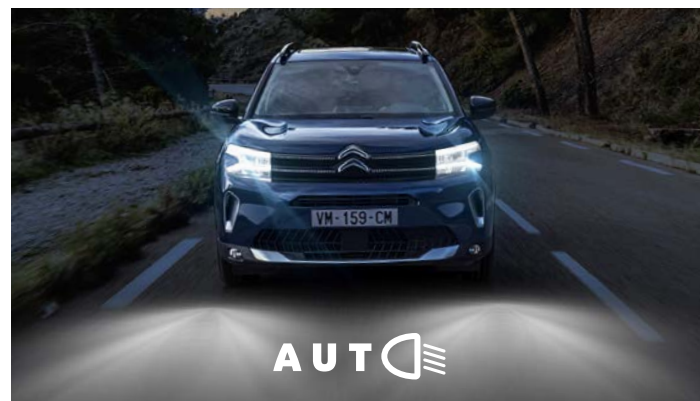

BLIND SPOT MONITORING SYSTEM*

Very useful on roads with more than one lane, this monitoring system indicates to the driver that there is a vehicle in the blind spots, using an orange LED located in the corner of the door mirrors.

ACTIVE SAFETY BRAKE

This emergency braking system reduces the risk of collisions. It works from speeds of 5 km/h with fixed or moving objects and with pedestrians. If a risk of collision is detected, an alert is given to the driver. If the driver does not react, the system applies the brakes automatically.

INTELLIGENT BEAM HEADLIGHTS*

This function automatically switches between main and dipped beams, depending on the traffic, when vehicles are detected approaching from the opposite direction or overtaking. This system provides optimum lighting when driving at night.

In addition to the driving assistance systems described below, New C5 Aircross offers the Coffee Break Alert, Electric Parking Brake, Collision Risk Alert, Driver Attention Warning, Extended Traffic Sign

Recognition and Speed Recommendation, Active Lane Departure Warning System, Hill Start Assist, Static Intersection Lighting and Reversing Camera with Top Rear Vision*.

KEYLESS ENTRY & START*

This system allows you to lock, unlock and start your vehicle without getting your key out. The vehicle recognises the driver as they approach.

PARK ASSIST**

This is an active parking assistance system, used for parallel parking and in car park spaces. When requested by the driver, it automatically detects a space, then controls the steering to park the vehicle with ease. You just have to engage reverse gear, accelerate and brake as required.

**Dependent on version.
** As an option.*

NEW C5 AIRCROSS PLUG-IN HYBRID DESIGNED TO MAKE LIFE EASIER

New Citroën C5 Aircross Plug-In Hybrid stands out due to its great simplicity of use. When the vehicle is being driven in Electric mode, an aqua blue lamp comes on at the base of the electrochrome interior mirror, clearly visible from the outside.

The charging cable is stored in a dedicated space under the boot floor. The charging flap is located at the rear left of the vehicle. This incorporates an LED indicator so the charging process can be monitored visually: white for the welcome mode ('ready to charge'), flashing green when charging is in progress, fixed green when charging is complete, blue for deferred charging. Once charged, the electric motor offers a maximum range of 55km (WLTP test cycle). For optimum use, it is recommended that New Citroën C5 Aircross Plug-In Hybrid is charged every day.

Note that Citroën provides a warranty on the traction battery for 8 years or 160,000km for 70% of the initial capacity.

PRACTICAL AND SIMPLE CHARGING

Charging the battery, which has a capacity of 13.2 kW and is located under the rear seats, stands out due to its simplicity:

Using a home charging point (or “wall box”) with the included Type 2 Mode 3 cable, charging takes approximately 2 hours.

Using a 3-pin domestic socket with the optional accessory domestic charging cable, charging takes approximately 6 hours.

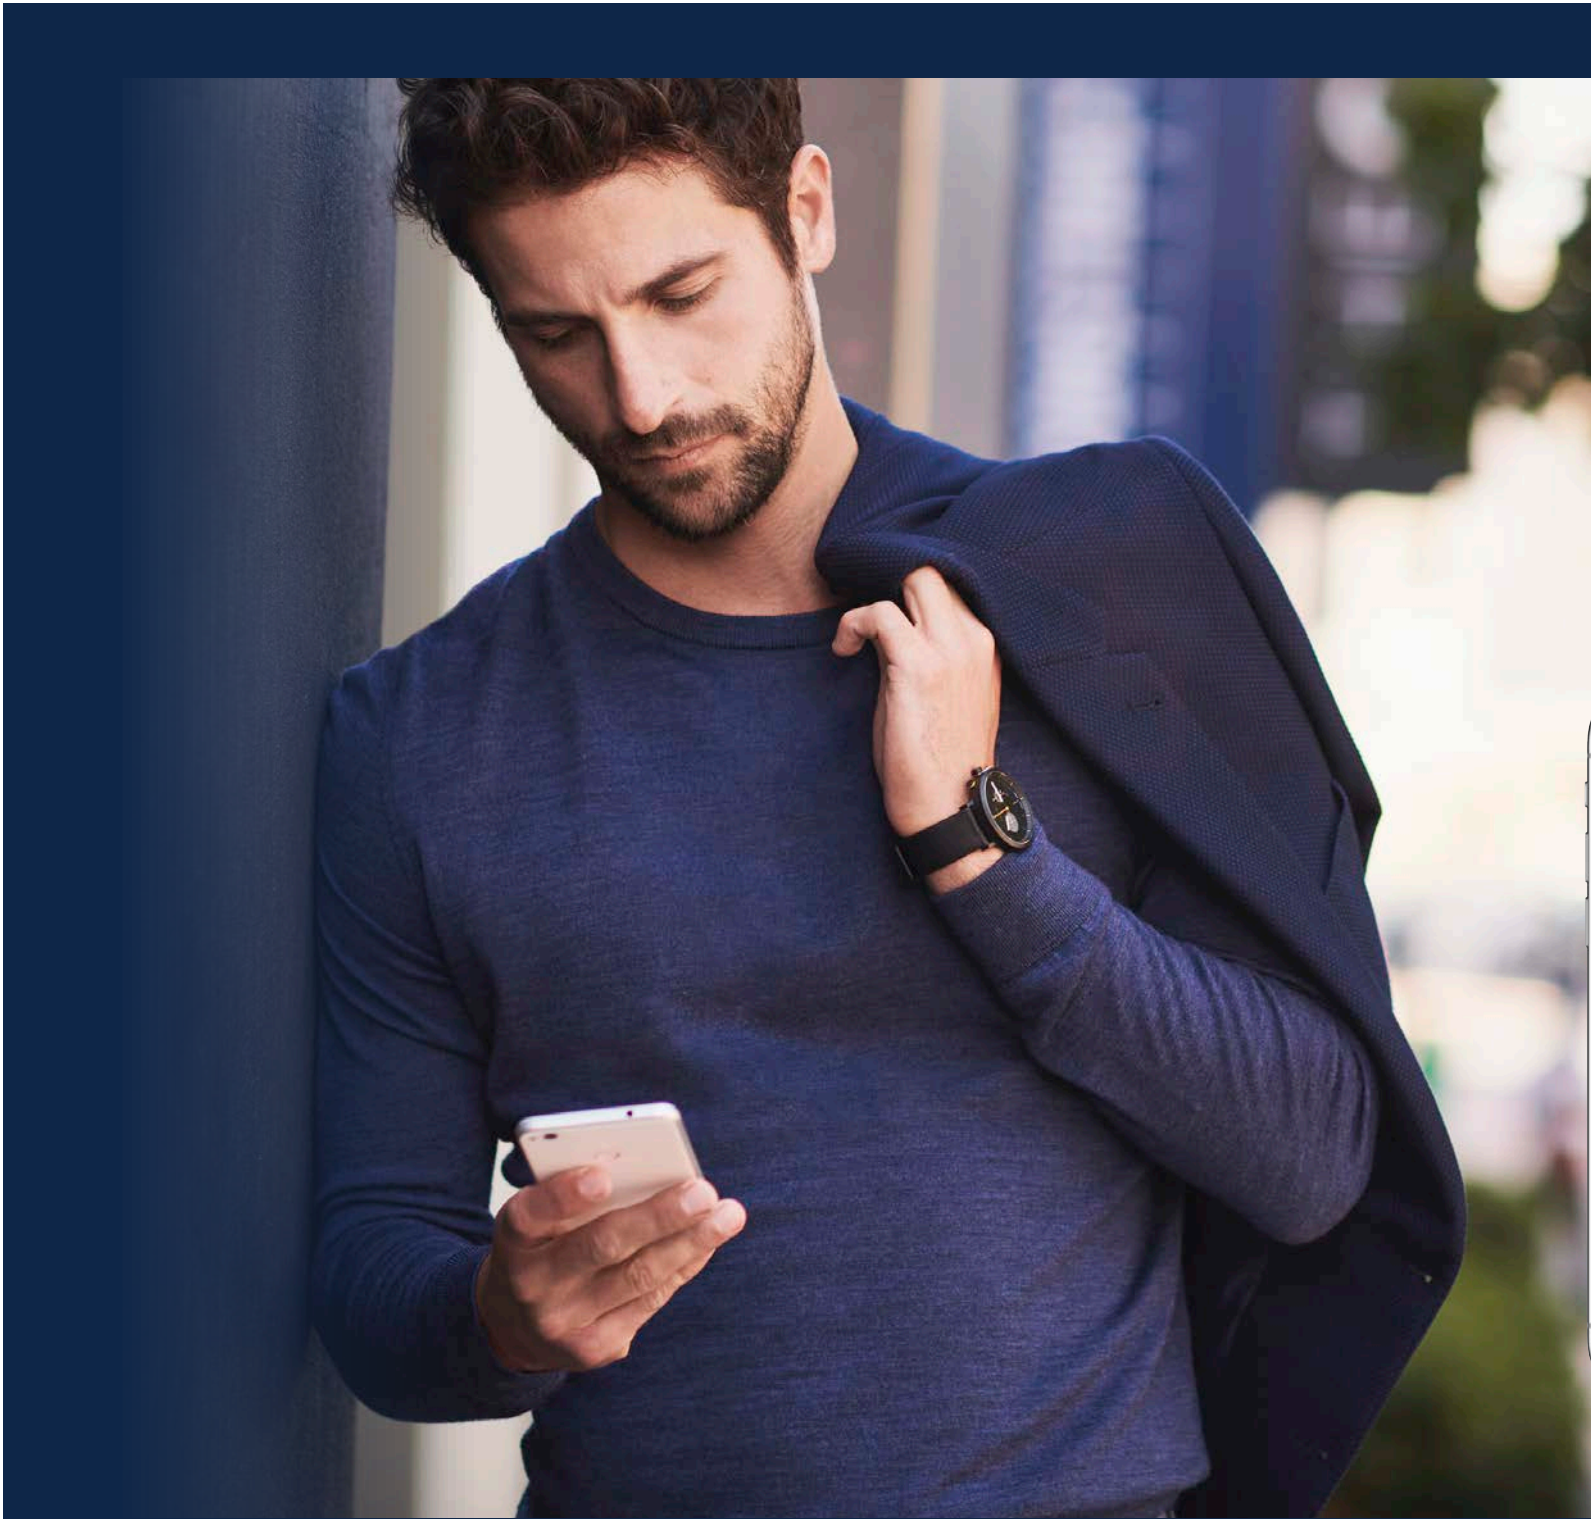

The image shows the interior of a Citroën C5 Aircross Plug-In Hybrid. On the right, a 10-inch capacitive touchscreen displays a blue-themed interface with a temperature of 22°C, a document icon, the word 'NORMAL', a large '19.5' in a blue box, and a car icon. Below the screen are air vents and a control panel with icons for a hand and music. On the left, the steering wheel is partially visible, and a digital driver's display shows a gear indicator.

DEDICATED HYBRID INTERFACE

To keep you informed about the hybrid drive mode and its operation, New Citroën C5 Aircross Plug-In Hybrid is fitted with a 12.3" digital driver's display including specific hybrid displays. You can see the essential information relating to hybrid driving, such as the power indicator and the range available.

The 10" capacitive touchscreen also displays specific information, such as the diagram of energy flows, your consumption statistics, the configuration of deferred battery charging or the "e-save" function which allows a reserve of electrical power to be saved for use at any time later in your journey when you may need to drive in Electric mode.

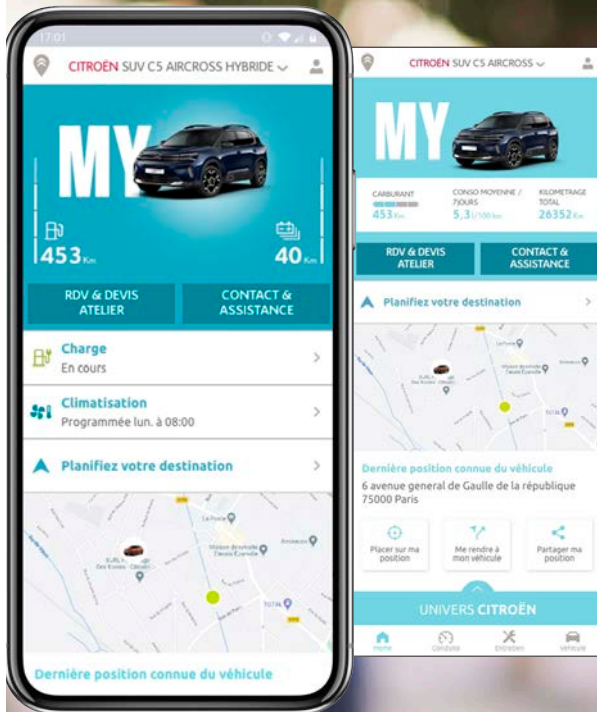

YOUR PERSONAL SPACE ON THE MY CITROËN APP

Stay connected at all times thanks to the MyCitroën smartphone app. You'll find key information about your vehicle at your fingertips, including:

- Vehicle location using the 'Find My Car' feature.
- Make an appointment at your local Citroën workshop.
- Consult the handbook.
- Consult your service booklet.
- Contact Citroën Assistance.

And in addition, for New C5 Aircross Plug-In Hybrid:

- Access key information including the level of charge of the battery, the charging time and the remaining range of the vehicle.
- Obtain updates on charging.
- Programme a deferred charge.
- Start or schedule temperature pre-conditioning.

CO ₂ emissions (g/km) - combined cycle	140 - 155	147 - 166	129 - 148	136 - 154	32

⁽¹⁾ Figures shown are for comparison purposes only; you should only compare these fuel consumption and CO₂ figures with other cars tested using the same technical standard. The fuel consumption you achieve, and CO₂ produced, in real world conditions will depend upon a number of factors: including the accessories fitted (post registration), variations in weather, driving styles and vehicle load. There is a new test WLTP (Worldwide Harmonised Light Vehicles Test Procedure) used to measure fuel consumption and CO₂ figures. The CO₂ figures shown are NEDCeq (New European Driving Cycle Equivalent), calculated using an EC correlation tool which converts WLTP figures to NEDC. These NEDCeq figures are based on the outgoing test cycle and will be used to calculate tax for the first registration. CO₂ and fuel economy figures may vary according to wheel fitment and optional extras fitted.
